

2007 CONTINUING PROFESSIONAL EDUCATION SEMINARS

Plan Now to Attend

APICS brings valuable training by renowned national speakers to you locally in 2007. Sessions are appropriate for small, medium and large organizations and each seminar earns 8 professional development points.

TOPICS AND SCHEDULE

Using Lean Manufacturing to Create Quick Throughput

Speaker: Terry Lunn, CFPIM, CIRM, CSCP

February 14, 2007

Overview: Filled with hands-on examples from real-world environments, this program is designed to show you how to shorten your lead times. Learn how actual companies have become more flexible in their operations and drastically reduced their throughput time.

Achieving Value Chain Excellence

Speaker: Dick Verbeek, CPIM, CIRM

April 11, 2007

Overview: Whether small enterprise or global manufacturer, everyone needs a customer driven supply chain that generates maximum earnings for the organization! This seminar features interactive simulations, computer exercises and group activities that facilitate exploration of tools and techniques for value added forecasting, cash-to-cash cycle time, total cost to own, enhanced customer service and more.

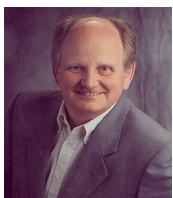

Putting It All Together - Integration of Lean, Six Sigma and Supply Chain Management

Speaker: Joni White

May 9, 2007

Overview: This important seminar discusses how the fundamental principles of operations learned in earlier seminars are categorically linked to achieving company excellence and competitiveness. Key aspects to be explored include how business strategy fits in, how to keep channel partners motivated and collaborative planning and operations.

TRAINING PROVIDERS - DISTINGUISHED SPEAKERS

Terry Lunn, CFPIM, CIRM, CSCP, runs his own company serving as an independent consultant since 1983. He has over twenty years experience in industry including industrial engineer, production control and shop foreman. He is also an author and national leader in APICS.

Dick Verbeek, CPIM, CIRM is the founder, owner, and president of Performance Plus Consultants, an industry leader in the delivery of experiential learning in continuous improvement and supply chain concepts. He has over 18 years in positions such as materials manager, internal quality and information analyst.

Joni White has been a full time APICS Instructor since 1998. Joni has over 25 years of planning, materials management, and manufacturing experience in custom lighting (ETO), value engineering, electronics (MTO & ATO), and remanufacturing (MTS).
